SUMMARY

Cloud-certified Data Analyst and BI Developer with more than 5 years of experience delivering automated ETL pipelines, cloud-based data products and single-source-of-truth reporting. Skilled in SQL, Python and BI visualization, translating business needs into AI-driven solutions that optimize analytical processes and ensure strict data integrity.

EXPERIENCE

Equifax San Jose, CR

Business Intelligence Developer Dec 2023 – Nov 2026

- Built automated ETL pipelines on GCP using SQL and Python (Pandas), deployed via GitHub Actions, transforming raw multi-source data into enterprise analytics assets.
- Engineered automated vulnerability workflows aligned with data governance standards, aggregating cross-organizational security data and routing actionable remediations, then delivered the threat monitoring process into production through Agile sprints.
- Partnered with Product Owners to build a GCP workflow (Cloud Functions, Pub/Sub, BigQuery) for synthetic availability monitoring, insourcing the process and cutting $300K in annual vendor costs.
- Designed Looker Studio dashboards that established single-source-of-truth metrics, enabling self-service reporting and integrated Jira request tracking.
- Implemented automated data validation rules behind the dashboards, ensuring accurate metrics for Gemini AI-assisted analytics.

Infrastructure support technician Feb 2023 – Nov 2023

- Designed customized analytics frameworks in Looker Studio to track the efficiency of a 9-person team using Jira and ServiceNow data, converting operational metrics into actionable performance insights.
- Built a centralized Confluence knowledge base for application workflows and troubleshooting, driving team alignment and enabling end-user self-service.
- Designed Tableau dashboards for end users, collaborating continuously with stakeholders and clients to address custom analytics needs for financial data.

Mercantil Nantes S.A. San Jose, CR

Data Analyst consultant Sep 2025 – Sep 2026

- Architected star schemas in SSMS and designed interactive Power BI dashboards using complex DAX measures, providing executive leadership with direct visibility into primary revenue streams and operating expenses.
- Developed predictive Power BI reporting solutions leveraging time-series analysis and purchasing trends to forecast quarterly demand—aligning inventory, production capacity, and sales strategy with emerging market opportunities.

Amazon San Jose, CR

Shipping and Delivery Support (SDS) Associate Sep 2022 – Feb 2023

- Optimized logistics workflows by analyzing delivery exceptions and root causes across the team, maintaining a personal client delivery success rate consistently above 92% for customers and Delivery Service Partners (DSPs).
- Led a data-driven coaching program for 20+ team members using statistical performance metrics and variance analysis to isolate skill gaps, keeping the team's client success rate above 85%.

Del Monte Limon, CR

Smart Farming Trainee Supervisor May 2022 – Aug 2022

- Extracted and ingested multi-source spatial and operational data collected via ArcGIS applications into SSMS databases, designing interactive Power BI dashboards to track key operational and financial KPIs.
- Analyzed hygiene and personal safety practices across 80%+ of production facilities using Power BI, identifying an initial compliance rate below 60% and communicating strategic remediation insights to cross-functional stakeholders.

Agroplan S.A. Cartago, CR
Financial Analyst May 2020 – May 2022

- Engineered automated ETL data collection workflows using Excel and Power Query, and designed optimized star schemas in Power BI to centralize performance dashboards across production and finance units.
- Translated complex metrics into actionable stakeholder reports, directly contributing to a complete financial recovery from a 20% deficit in 2020 to break-even in 2021.

PROJECTS

AI Job Application Assistant (open source) Nov 2026
github.com/FBaradin/ai-job-application-assistant

- Built an open-source, AI-assisted job-fit workflow on Claude Code and Python that scores job postings across 5 weighted dimensions and generates a tailored, ATS-friendly resume, application kit and fit report, with Gmail and Google Sheets automation.
- Added safeguards that keep every generated resume truthful, automatically checking each draft against the candidate's real experience and blocking invented skills, made-up metrics or text copied from the job posting.

EDUCATION

Universidad de Costa Rica San Jose, CR
Bachelor of Biosystems Engineering Feb 2021

- Thesis: Design, implementation, and evaluation of an evaporative cooling system for dairy cows in a commercial farm. DOI: 10.15517/2aczcw43

Instituto Tecnológico de Costa Rica San Jose, CR
Specialization in Business Analytics Dec 2021

CERTIFICATIONS

Google Generative AI Leader, Google	Jun 2026
ServiceNow Certified System Administrator (CSA), ServiceNow	Feb 2026
Associate Cloud Engineer, Google	Jul 2024
Google Data Analytics, Google	Feb 2023
Microsoft Certified: Azure Data Fundamentals DP-900, Microsoft	Jun 2022
Microsoft Certified: Azure Fundamentals AZ-900, Microsoft	May 2022
Scrum Foundation Professional Certification, Certiprof	Oct 2021

SKILLS

Technical: Data analysis, Forecasting, KPI design, Data visualization, ETL pipelines, Data validation, Data governance, Generative AI, Prompt engineering, Data modeling, Statistics, Agile/Scrum
BI & Visualization: Power BI, DAX, Power Query, Looker Studio, Tableau, Excel
Data & Cloud: SQL, Python, Pandas, BigQuery, GCP, Cloud Functions, Pub/Sub, SSMS / SQL Server, ArcGIS, JSON Schema, Google Sheets API
DevOps & Collaboration: GitHub, GitHub Actions, Jira, Confluence, ServiceNow, Gemini, Claude Code
Soft Skills: Stakeholder communication, Training and mentoring, Collaboration, Problem solving
Languages: Spanish (Native), English (Professional working proficiency)
